

APTLD83 - Session 4B

Technical: Maintaining an effective and secure DNS

Session 4B: Maintaining an effective and secure DNS

Moderator: Nguyen Thi Thu Thuy, VNNIC

Panelist:

- Christian Schöpp, NIC.AT
- Ed Lewis, ICANN (remotely)
- Nai-Wen Hsu, TWNIC
- Nguyen Van Tri, VNNIC

Questions

- **Question 1:** There is idea that DNS is critical infrastructure, could be considered as “heart” for Internet and currently DNS is facing serious issues and challenges. Do you agree to that points and could you share your idea about challenges for DNS today?
- **Question 2:** Have your TLD ever faced to important issues for DNS and what do you think is the most threaten for safe TLD operation as well as an effective DNS operation?
- **Question 3:** DNS is critical infrastructure and it is facing challenges which is already pointed out by the panelist. So what we should do to maintain an effective and secure DNS. Let’s see the viewpoint from our panelist?
- **Question 4 (For the audience):** Do you agree with ideas from panelists and would you like to share your idea, or ask questions for the panelists
- **Question 5:** Could you share your ideas about a roadmap for top level domain registry to builds a secure and robust DNS system?
- **Question 6 (For the audience):** How do you think about the roadmap for a robust DNS system that we’ve heard from panelists. It’s totally OK if you could share your idea on that?

THANK YOU !
