

CYBERSECURITY REGULATION AND ROLE OF GOVERNMENT

By: Ms. Anisone Kingsada

GOVERNMENT DIRECTION

The sixth strategy: Develop and ensure the security of ICTs and the CIIP.

UPDATE ON THE LAW, STRATEGY AND SECURITY GUIDELINE

CYBER SECURITY LAW

❖ Cybersecurity Law

We are currently in the drafting process; the expected completion date is the end of 2023, so we are now halfway to 60 percent; the scope of the structure is completely specified and determined. Its main purpose is that it can be used as a tool to manage, monitor, and supervise cyber security activity in order to avoid cyberattacks on the country's critical information infrastructure and to guarantee national stability, peace, and social stability. It can also be linked to regional and worldwide networks.

NATIONAL CYBER SECURITY STRATEGY

❖ Cybersecurity Strategy

We are now drafting the national cybersecurity strategy, which aims to develop cyber security in combination with economic and social growth.

- Investigate and develop laws to assist in the advancement of digital technologies that are now impacting society throughout the world.
- Create technical systems as well as effective coordinating methods.
- Encourage and promote cyber security awareness efforts in order to reach the greatest number of individuals and society.
- Create and improve staff knowledge to be proficient in cyber security work equivalent to international and regional standards.

❖ Security Guideline (lao language version only)

Computer System Security guideline

Create, develop and manage secure websites guideline

Electronic mail security guideline (under Drafting)

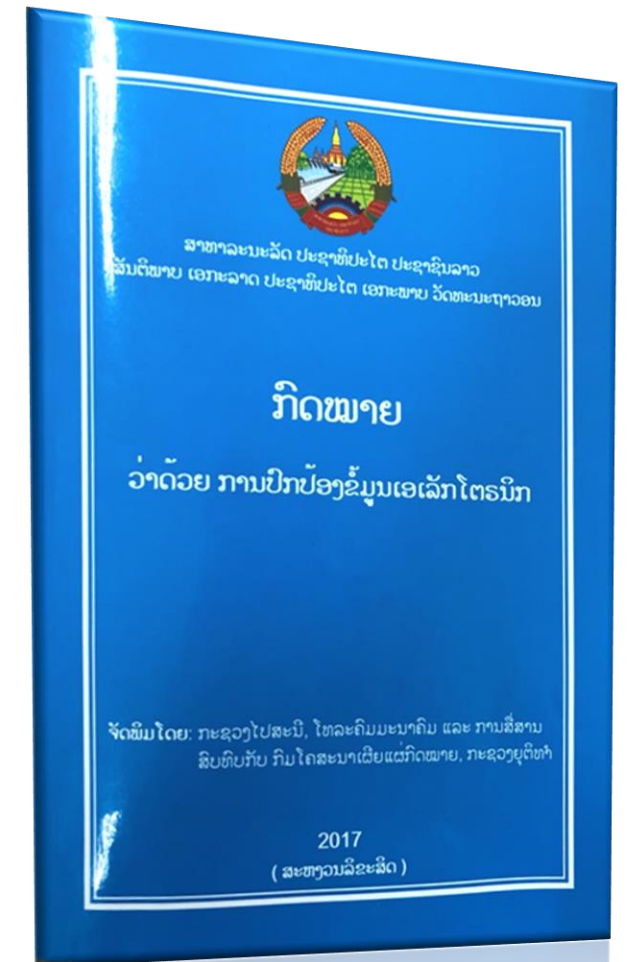

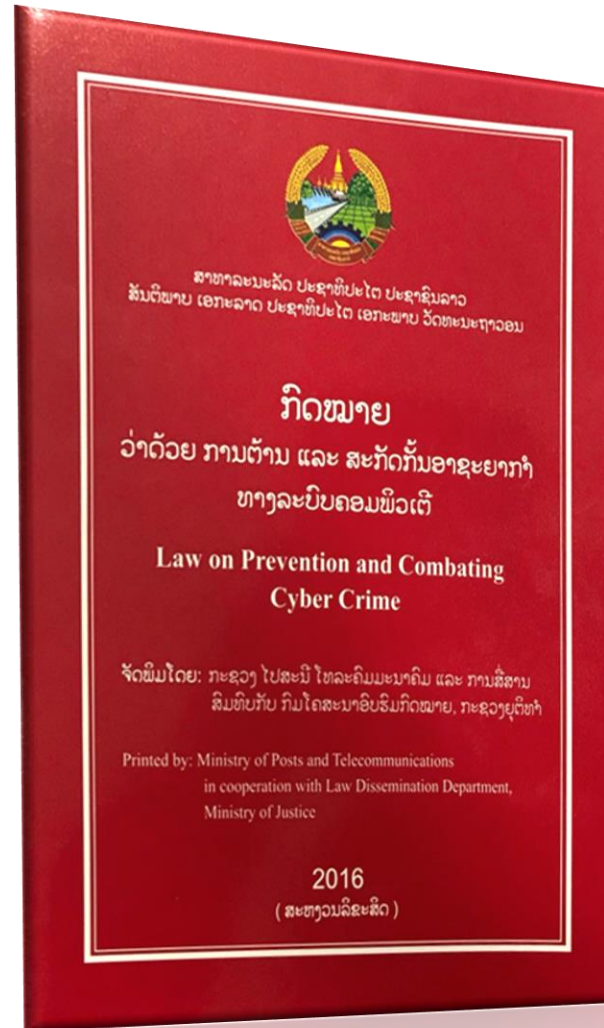

LEGISLATIONS APPLIES TO CYBERSECURITY

The government has designed and implemented regulations to address cyber incidents.

This Law defines principles, regulations and measures on the managing, monitoring, inspecting the campaign of preventing and combating cyber crime to make it efficient aimed at preventing, combating, curbing and eliminating crime, protecting database system, server system, computer data and information in order to ensure the national security, create peace and order in society, integrate it regionally and internationally, and contributing to national socio-economic development with gradually and sustainably progress.

In terms of cybersecurity policy, we still do not have a specific one, and we are now studying and researching; therefore, we are asking for your assistance to overcome that difficulty.

FUTURE PLAN

Continue to update the existing law in accordance with the circumstances of each period and disseminate it to society both in the central and local areas.

Continue to conduct research and create the necessary cybersecurity laws, particularly cybersecurity policies.

THANK YOU
