

Rights Protection Mechanisms for Top-Level Domains

The Serbian National Internet
Domain Registry Foundation

DATE
22/02/23

PRESENTER
Dejan Đukić

EVENT
APTLD 83

Domain name disputes arise between trademark owners, or more generally intellectual property ('IP') owners, on the one hand, and domain name registrants, on the other hand.

Facts relevant for difference between domain names and trademarks:

- legal nature
- territory
- industry
- process of registration

Right protection mechanisms for domains:

- the alternative domain name dispute resolution decision
- court process
- data accuracy checking
- suspension

Data disclosure:

- Competent authorities
- Attorneys

Main characteristics of Serbian model:

- Arbitration model based on best practices
- Independent body with three panelists
- Duration – 60 days
- Both parties has right to initiate proceeding before the competent court
